

Technical Advisory Committees

Membership

June 2015

Technical Advisory Committees (TACs) are small advisory groups made up of nationally known scientists and engineers. For the 2017 Coastal Master Plan, a Predictive-Models TAC has been established to advise the technical team working to develop and implement the Model Improvement Plan. In addition, a Resiliency TAC has been created made up of experts in the areas of socio-economics, social capital, social vulnerability, and hazard mitigation/disaster planning to provide working-level guidance and recommendations to CPRA on how best to integrate these aspects into decision criteria for the 2017 Plan.

Predictive Models TAC

Name	Organization
John Callaway, Ph.D.	University of San Francisco
Scott Hagen, Ph.D.	Louisiana State University
Courtney Harris, Ph.D.	Virginia Institute of Marine Sciences
Wim Kimmerer, Ph.D.	San Francisco State University
Mike Waldon	U.S. Fish and Wildlife Services (retired)

Resiliency TAC

Name	Organization
Daniel Aldrich, Ph.D.	Northeastern University
Diane Austin, Ph.D.	University of Arizona
Gavin Smith, Ph.D.	University of North Carolina
Dan Zarrilli	City of New York, Mayor's Office of Recovery and Resiliency
