Louisiana RESTORE Act
Overview

Chris Barnes
Legal Advisor
Office of the Governor – Coastal Activities
RESTORE Act Allocations

Clean Water Act Penalties → 20% Oil Spill Liability Trust Fund → 80% Gulf Coast Restoration Trust Fund

Pot 1 - Direct
- 35% Equally distributed directly to 5 Gulf States (AL, FL, LA, MS, TX)

Pot 2 – Council Selected Restoration
- 30%* Gulf Coast Ecosystem Restoration Council for ecosystem restoration

Pot 3 – Spill Impact
- 30% Impact based distribution to 5 Gulf States (AL, FL, LA, MS, TX)

Pot 4 - NOAA Science Program
- 2.5%* Gulf Coast Ecosystem Restoration Science, Observation, Monitoring, and Technology Program

Pot 5 - Centers of Excellence
- 2.5%* Centers of Excellence

*Supplemented by interest generated by the Trust Fund (50% to Gulf Coast Ecosystem Restoration Council, 25% to Science Program, 25% to Centers of Excellence)
RESTORE Act Roadmap

Direct Component (Pot 1) – 35%

- Of the total amounts made available to the State of Louisiana...
  - **70% to the State** – to CPRA
  - **30% to coastal zone parishes** according to the following weighted formula:
    - 40% - miles of the parish shoreline oiled
    - 40% - population
    - 20% - land mass

Distinction between Pot 1 and Pot 3

Pot 1 (Direct Component to *LA Parishes*) – 30% of the total LA allocation is provided directly to coastal zone parishes according to the following weighted formula
  - (i) 40% - miles of oiled shoreline
  - (ii) 40% - population
  - (iii) 20% - land mass

Pot 3 (Spill Impact Component to *States*) – amount disbursed to each state is based on a formula established by the Council by regulation based on the following criteria
  - (i) 40% - miles of oiled shoreline
  - (ii) 40% - proximity to the rig
  - (iii) 20% - population
Principles of the Impact Allocation

• The Oil Spill Restoration Impact Allocation is the only one of the three primary funding components in the Act that is tied to impact.

• The allocation should reflect actual impact.

• Measures of impact should have a logical correlation to actual impact.
The amount disbursed to each Gulf Coast State “shall be based on a formula established by the Council by regulation that is based on a weighted average of the following criteria”

- (i) miles of oiled shoreline - (shoreline oiling)
- (ii) proximity to the rig - (average distance)
- (iii) population - (bordering the Gulf)
(i) Miles of Shoreline

- 40% “based on the proportionate number of miles of shoreline that experienced oiling on or before April 10, 2011, compared to the total number of miles of shoreline that experienced oiling as a result of the Deepwater Horizon oil spill”
(i) Miles of Shoreline

- **Degree of oiling** (heavy, moderate, light, etc.);
- **Environmental sensitivity to oiling** of the shoreline that experienced oiling based on the environmental sensitivity of different habitats to oiling; and
- **Duration of oiling**.
(ii) Proximity to the DWH Rig

- 40% “based on the inverse proportion of the average distance from the mobile offshore drilling unit Deepwater Horizon at the time of the explosion to the nearest and farthest point of the shoreline that experienced oiling of each Gulf Coast State”
PROXIMITY: 40% “based on the inverse proportion of the average distance from the mobile offshore drilling unit Deepwater Horizon at the time of the explosion to the nearest and farthest point of the shoreline that experienced oiling of each Gulf Coast State”

**HYPOTHETICAL OIL SPILL
FOR ILLUSTRATIVE PURPOSES ONLY**

<td>13%</td>
</tr>
</tbody>
</table>
(iii) Population

- 20% “based on the average population in the 2010 decennial census of coastal counties **bordering the Gulf of Mexico** within each Gulf Coast State”

*No counties or parishes that received documented oiling impact should be omitted from this portion of the Oil Spill Impact Allocation.*
Conclusion – Impact Allocation

• One day of trace oil on a less sensitive shoreline ≠ one mile of heavy oil on a highly sensitive shoreline that persists for years.

• A state should not be penalized in the impact allocation for having larger amounts of oiling.

• What constitutes a border with the Gulf has yet to be determined.
Louisiana RESTORE Act - Council-Selected Restoration Component (Pot 2)

*Supplemented by interest generated by the Trust Fund (50% to Gulf Coast Ecosystem Restoration Council, 25% to Science Program, 25% to Centers of Excellence)
Pot 2 Roadmap (30%)

• Process

• Louisiana Solicitation and Submission

• RESTORE Funding
Process for Council-Selected Restoration Component

Projects Submitted. Projects may focus on Habitat and Water Quality goals, with an emphasis on projects that are foundational, sustainable, have a high probability of success and that have community benefits.

Project Vetting Activities

Eligibility Verification and Budget Reasonableness, Coordination Reviews

Science Evaluation

Priority and Commitment to Plan Evaluation

Environmental Compliance Readiness

Results from proposal submission and evaluation will be compiled into a context report and attached to each proposal to aid in the development of a draft Funded Priorities List.
Process Results

• Projects and programs selected by the Council will be included on a draft Funded Priorities List (FPL).

• The draft FPL will be published for public comment.

• Council plans to publish draft FPL in late 2015.
State Solicitation

- Louisiana has been accepting project and program proposals since the days after the spill.
- Deadline to submit proposals to Louisiana for consideration is September 30.
- Proposals submitted after September 30 will be ineligible for consideration in this initial phase of funding.
State Solicitation

- Both projects and programs are acceptable.

- If you do not wish to submit a project or program proposal, your feedback on how you would like to see RESTORE funds spent is still welcome.

- Priority will be given to projects and programs in Louisiana’s 2012 Coastal Master Plan.
How Much Funding for Draft FPL?

• The Council anticipates spending only monies available from the Transocean settlement in this initial funding exercise.

• As of February 2015, approximately $240 million will be available.

• Council envisions funding $150 to $180 million worth of projects now.
What About BP and Other Funds?

- The language in the draft FPL will indicate that when these funds become known, future amendments to the FPL will include significantly larger projects and project lists.
