

Download Data from the Master Plan Data Viewer!

Have you wanted access to Coastal Protection and Restoration Authority's (CPRA) data developed for the 2017 Coastal Master Plan? This data is now available for download at the [Master Plan Data Viewer!](#)

The Master Plan Data Viewer is web-based, geospatial visualization tool that integrates and displays results from CPRA's [2017 Coastal Master Plan](#) effort. The viewer was developed to help coastal Louisiana communities better understand their flood risk and how this risk may change in the future. The viewer also provides information about the state's holistic restoration and risk reduction strategy for the Louisiana coast. Key features include:

- **Coastal Data.** Includes land change, flood risk, economic damage, coastal vegetation, and social vulnerability;
- **Current and Future Conditions.** Includes current day, near term (10 years), and long-term (50 years) intervals under different future environmental scenarios;
- **2017 Coastal Master Plan Projects.** Users can see how master plan projects progress over time, and various project details like cost, implementation period, current phase, and funding sources (when funded); and
- **Resources to Reduce Risk.** Connects users to a range of resources from GOHSEP, FEMA, and LSU Ag Center.

Master plan data has been used in many initiatives including:

- **Louisiana's Strategic Adaptations for Future Environments (LA SAFE):** \$39 million HUD NDRC grant to develop adaptation plan framework and implement resilience-enhancing development strategies in six parishes;
- **Isle de Jean Charles Resettlement Project:** \$48 million HUD NDRC grant for relocation planning for Native American community in Terrebonne Parish;
- **Residents and Homeowners:** Learn about current and future flood risk at their home or business address; and
- **Academic Students:** Data has been used in research and dissertation projects.

View and download a wide array of geospatial coastal information from the **Master Plan Data Viewer** at: <https://cims.coastal.louisiana.gov/masterplan/>
