

## St. Martin Parish Coastal Projects

### PROJECTS IN PLANNING

#### **South Central Coast Plan (TV-0054)**

State - Estimated Total Cost \$970,000

The project integrates ecosystem restoration and hurricane protection alternatives to address the coastal issues of South Central Louisiana.

### NRDA REC USE PROJECTS

#### **Statewide Artificial Reefs**

NRDA – LDWF – Estimated Cost \$6,000,000

This project enhances eleven multipurpose reef sites across coastal Louisiana.

### 2017 COASTAL MASTER PLAN PROJECTS

#### *Risk Reduction Projects Year 1-30*

#### **St. Martin Nonstructural Risk Reduction (SMT.01N)**

Project includes floodproofing non-residential properties where 100-year flood depths are 1-3 feet, elevating residential properties where 100-year flood depths are 3-14 feet, and acquisition of residential properties where 100-year flood depths are greater than 14 feet.
