

**ADDENDUM 1 TO BID DOCUMENTS FOR THE  
BLACK BAYOU HYDROLOGIC RESTORATION MAINTENANCE (CS-27)  
CAMERON AND CALCASIEU PARISHES, LOUISIANA**

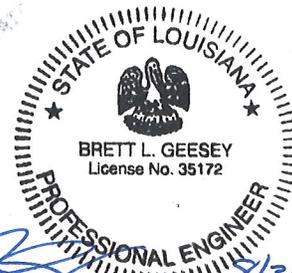

**LOUISIANA COASTAL PROTECTION AND RESTORATION AUTHORITY**

**August 3, 2018**

PREPARED BY

HDR ENGINEERING, INC.  
201 Rue Iberville, Suite 115  
Lafayette, LA 70508  
Proj. No. 10058585

*[Handwritten signature]*  
8/3/2018

**ADDENDUM 1 TO BID DOCUMENTS  
BLACK BAYOU HYDROLOGIC RESTORATION MAINTENANCE (CS-27)**

This addendum shall be considered part of the Plans, Specifications, and Contract Documents (except as noted otherwise) and is issued to change, amplify, or delete from or otherwise explain these documents where provisions of this addendum differ from those of the original documents. This addendum shall have precedence over the original documents and shall govern.

**Bidders shall acknowledge receipt of this addendum in the Louisiana Uniform Public Work Bid Form.**

I. CPRA Response to Bidder Questions:

**Question 1:** *“Pre-bid meeting discussions indicated that the multibeam hydrographic surveys were needed to map the water bottoms such that filling efforts can be confirmed. Can single-beam, dual frequency hydrographic systems be used for the “Type I” surveys as long as shot frequency is such that a clear, definitive surface can be generated from the data?”*

**Response:** Single-beam devices can be used for the “Type I” surveys as long as the density of survey shots is equal to or finer than the required 3ft x 3ft spacing and all other requirements stated in “TS-6 Construction Surveying” are met. Accordingly, please find revisions to Specifications below.

**Question 2:** *“Pipelines that may have been directionally drilled during initial installation may be too deep to probe. If some pipelines are too deep to probe, will magnetic signals resulting from the magnetometer survey be sufficient to mark the pipelines positions?”*

**Response:** Yes, if pipelines are deemed too deep to probe based on Contractor’s coordination with the pipeline companies and as long as Contractor follows the requirements stated in “SP-13 Landowner and Pipeline Requirements.”

**Question 3:** *“Please confirm that barge draft surveys are not required to be performed by a PLS.”*

**Response:** Barge displacement surveys are not required to be performed by a licensed Professional Land Surveyor.

**Question 4:** *“Please advise the estimated budget for the above referenced project.”*

**Response:** Engineer’s Opinion of Probable Construction Cost for this project is nearly \$4.4M.

**ADDENDUM 1 TO BID DOCUMENTS  
BLACK BAYOU HYDROLOGIC RESTORATION MAINTENANCE (CS-27)**

II. Revisions to Specifications:

**1. Revision to Contract Completion Time**

This Addendum changes the Contract completion time to **One Hundred Sixty (160)** consecutive calendar days. The completion time stated in “Instruction to Bidders” and Special Provisions “SP-3 Bid and Contract Dates/Time” is hereby modified to reflect the revised completion time.

**2. Technical Provisions “TS-6 Construction Surveying”**

Add the following to Paragraph “6.8.1 Type I Surveys”.

*“As an alternative to multi-beam surveys, single beam surveys may be performed for Type I surveys provided survey shots are obtained with a density equal to or finer than 3ft x 3ft.”*

**3. Technical Provisions “TS-10 Pipeline Protection”**

Replace the Table in “Paragraph 10.9.1 Stone” with the following Table.

<b>Crushed Stone/Concrete Gradation</b>	
<b>Sieve (US Standard)</b>	<b>Percent Passing (By Weight)</b>
1 ½”	100
1”	95-100
½”	25-60
#4	0-10
#8	0-5

III. Revisions to Plans:

**None.**

IV. Other:

**See attached for copies of the Pre-Bid Conference sign in sheet.**

# Non-Mandatory Pre-Bid Sign-In Sheet

Project Name: Black Bayou Hydrologic Restoration Maintenance

Project Number: CS-27

Date: July 24, 2017

Location: 635 Cajundome Blvd., Lafayette, LA
