REQUEST FOR INFORMATION (RFI) ARTIFICIAL REEF PRODUCT INFORMATION

RFI NO. 2503-19-04

ADDENDUM 2

APRIL 16, 2019

Questions and Answers

- 1) If you do not have the exact same product configurations on 3 separate installations that you would propose for this PO-0174 project, but do have at least 1 to 2 projects installed with the configuration (i.e. we have a product currently installed at P0-0148), applicable to this project requirements, and meet the performance criteria for this job, are you eliminated?

RESPONSE: The intent of the RFI is to evaluate known products and product configurations. Site conditions vary from project to project which may result in different product geometries or product configurations. Product manufacturers shall have a minimum of three separate installations on property not owned or affiliated with the product manufacturer using the proposed product, or similar product of varying geometries. Proposed product configurations shall be the same as or similar to previous installations. Product manufacturers proposing stacking or interlocking products shall have at least one installation using a stacking or interlocking arrangement.

- 2) The request for meeting performance criteria does not allow for the manufacturing of new sizes of the "same product & configuration" thus eliminating the opportunity to meet performance criteria requested, due to not having three jobs utilizing new size with similar configurations and geometry; is this true and how the manufacturer should interpret RFI?

RESPONSE: See response above.

The RFI Submittal due date has been extended to April 26, 2019 at 3:00pm local time. Product manufacturers who have already submitted shall review their response with this addendum in mind. If the response remains unchanged, product manufacturers shall acknowledge this addendum, and any other addendum issued, on the enclosed Addendum Acknowledgement Form or in a revised transmittal letter and submit, via email, to CPRAContracts@la.gov.
