COASTAL PROTECTION AND RESTORATION AUTHORITY

This document was developed in support of the 2023 Coastal Master Plan being prepared by the Coastal Protection and Restoration Authority (CPRA). CPRA was established by the Louisiana Legislature in response to Hurricanes Katrina and Rita through Act 8 of the First Extraordinary Session of 2005. Act 8 of the First Extraordinary Session of 2005 expanded the membership, duties, and responsibilities of CPRA and charged the new authority to develop and implement a comprehensive coastal protection plan, consisting of a master plan (revised every six years) and annual plans. CPRA's mandate is to develop, implement, and enforce a comprehensive coastal protection and restoration master plan.

Coastal Protection and Restoration Authority. (2023). 2023 Coastal Master Plan: Appendix A: Outreach & Engagement. Version 3. (p.20). Baton Rouge, Louisiana: Coastal Protection and Restoration Authority.

ACKNOWLEDGEMENTS

This document was developed in support of the 2023 Coastal Master Plan under the guidance of the Master Plan Delivery Team:

- Coastal Protection and Restoration Authority (CPRA) of Louisiana – Stuart Brown, Ashley Cobb, Madeline LeBlanc Hatfield, Valencia Henderson, Krista Jankowski, Sam Martin, and Eric White
- University of New Orleans – Denise Reed

1.0 INTRODUCTION

The 2023 Coastal Master Plan is a Louisiana plan for Louisiana people – a plan based on science and responsive to the needs of our communities. While coastal Louisiana is home to more than two million people, it also boasts the world’s largest port complex that handles 20% of the nation’s waterborne commerce and contains important fisheries habitats that support a commercial fishing industry that provides 25% of the seafood in the continental United States. With all of these critical industries and a large population made up of individuals who each have their own unique stories and sense of place, the master plan must represent a number of diverse groups with varied opinions. By bringing these stakeholders together through consistent engagement and ongoing dialogue, we find common ground in our collective desire to protect and restore our coast for generations to come.

1.1 OUR PRINCIPLES

The following outreach and engagement principles were first established to guide our efforts for the 2012 Coastal Master Plan, and we felt strongly about renewing this commitment for the 2023 Coastal Master Plan. At every step of the development process, we considered these principles and their importance in ensuring that we provide the people of Louisiana the best possible plan.

- **Scope.** Stakeholders and citizens should be given opportunities to learn about and comment on 2023 Coastal Master Plan tools and the processes that assist in creating the plan – not just the finished plan itself.
- **Timing.** Comments and ideas should be received, reviewed, and incorporated while the 2023 Coastal Master Plan is being developed, not after the fact.
- **Fair hearing.** Not every stakeholder or citizen preference will be included in the 2023 Coastal Master Plan. However, the State promises that each idea will receive a fair hearing and that questions will be answered promptly and with care.
- **Access.** The State has an obligation to provide a variety of ways for stakeholders and citizens to learn about and participate in the master planning process, including small group gatherings, web offerings, direct communication with local and State government, and public meetings.

1.2 OUR GOALS

Throughout the development of the master plan, we were focused on a number of goals not only related to interacting with citizens and stakeholders, but on building their trust in the planning process as well.

- To develop public confidence that the Coastal Protection and Restoration Authority (CPRA) is the primary technical authority on coastal protection and restoration for Louisiana and is making decisions in the best interest of Louisiana's citizens.
- To develop broad-based support that will influence passage and implementation of the 2023 Coastal Master Plan.
- Address and incorporate citizens' concerns and ideas.

2.0 OUTREACH & ENGAGEMENT FRAMEWORK

This section describes the Outreach and Engagement Framework utilized for the 2023 Coastal Master Plan. The effort was led by the Planning Team with the support of advisory groups and engagement with a number of key stakeholders.

2.1 THE PLANNING TEAM

The 2023 Coastal Master Plan's Planning Team was a diverse team of representatives from a variety of organizations, including CPRA and private/non-profit organizations. The Planning Team focused on assembling technical tools and data as well as engaging with stakeholders and citizens across coastal Louisiana as the 2023 Coastal Master Plan was developed.

Additionally, the Planning Team worked with a variety of experts, including individuals who know coastal Louisiana well and individuals who brought in new ideas from other places, with the goal of ensuring the 2023 Coastal Master Plan was both rooted in the realities experienced by people who live and work on the coast every day and reviewed by nationally renowned scientists and engineers.

OUTREACH AND ENGAGEMENT TEAM

As part of the Planning Team, the Outreach and Engagement Team was comprised of dedicated individuals with experience in stakeholder engagement, public outreach, communications, graphic design, and data visualization. In addition to the dedicated team members, multiple strategies were deployed to provide information and training to other outreach specialists, governmental employees, and community organizers throughout coastal Louisiana in order to provide them with materials and tools to support their ongoing outreach efforts. As such, they were able to educate and engage their stakeholders and constituents on the effort.

TECHNICAL TEAM

The 2017 Coastal Master Plan's Technical Team was a collaborative group of more than 70 experts from a wide range of organizations with extensive technical and analytic expertise in developing predictive models and planning tools. Many of the academics and practitioners that were part of this group had been involved in previous planning efforts and were able to offer a robust depth of

knowledge of coastal Louisiana and the tools used to create the 2023 Coastal Master Plan.

2.2 STAKEHOLDERS AND ADVISORY GROUPS

To support and provide critical input into the development of the 2023 Coastal Master Plan, CPRA engaged a diverse group of stakeholders to serve as key partners and advisors in helping to determine how best to meet the State's current restoration and protection needs and adapt to future conditions. These stakeholders represented business and industry, federal agencies, non-profits, academia, local organizations, coastal scientists, planning experts, and more. These groups were not asked to endorse the master plan; instead, their role was to provide recommendations and guidance as it was developed so that the master plan would ultimately reflect a broad range of perspectives and a world-class technical approach.

3.0 STAKEHOLDER ENGAGEMENT

The Outreach and Engagement Team developed an engagement strategy that focused activities into three phases: 1) baseline establishment, 2) active engagement, and 3) draft plan review and comment. Each of these phases provided specific inputs into the master plan development process along a specific timeline. While the phases are shown separately, some components and activities overlapped between phases or occurred concurrently. Throughout these three phases, the Outreach and Engagement Team’s efforts combined opportunities to hear from coastal communities in person and online through a number of innovative web tools and resources that are detailed below.

3.1 BASELINE ESTABLISHMENT

INNOVATIVE WEB TOOLS

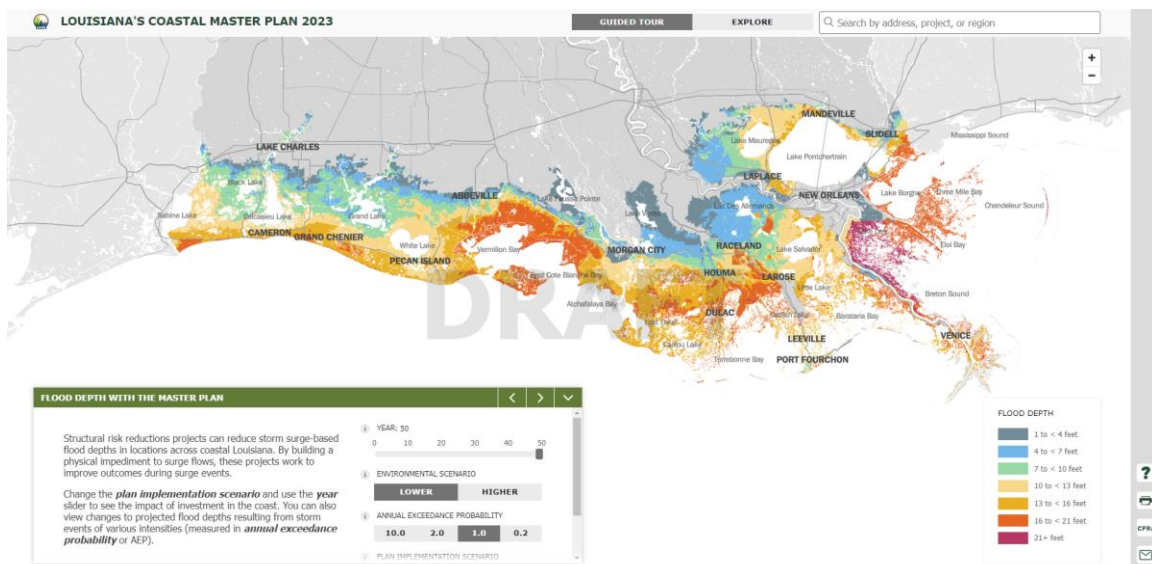

Figure 1. A snapshot of the Master Plan Data Viewer.

3.2 ACTIVE ENGAGEMENT

PRESENTATIONS AND BRIEFINGS

Throughout the 2023 Coastal Master Plan planning process, we prioritized educating key stakeholder groups and providing information about the master plan effort in order to better engage citizens across coastal Louisiana. We worked with Coastal Advisory Team (CAT) members and other partners to identify industry associations, State task forces, local/regional governmental entities, advocacy organizations and non-profits, and community groups. These groups were tremendously helpful in identifying existing meetings and avenues at which to present and gain feedback on the master plan effort. In total, we conducted over 190 such briefings throughout this process leading up to the release of the draft plan.

In addition to a number of levee boards, coast wide organizations, NGO's, academics, and forums and conferences, we met with the following CPRA-related groups and government agencies:

- **CPRA Board.** CPRA is guided by the CPRA Board, which oversees the development of the master plan and annual plans, and represents the State's positions relative to protection and restoration policies. The CPRA Board meets monthly and provides an opportunity for the Planning Team to deliver formal updates to the board – as well as the public in attendance – on progress throughout the master plan development process.
- **Governor's Advisory Commission on Coastal Protection, Restoration and Conservation.** The Commission meets bi-monthly and provides an opportunity for the Planning Team to deliver formal updates to the Commission as well as the public in attendance on progress throughout the master plan development process.

A list of briefings and presentations made to public groups, as well as stakeholder and community groups related to the development of the 2023 Coastal Master Plan, is included below.

DATE	ORGANIZATION/ENTITY
1/10/2023	GOVERNOR'S ADVISORY COMMISSION ON COASTAL PROTECTION, RESTORATION AND CONSERVATION

Throughout the outreach and engagement process, we met with state legislators and parish officials to learn their perspectives on how coastal action affects communities. In addition, we developed and posted a number of webinars to provide updates on different analytical aspects of the 2023 Coastal Master Plan. Additionally, technical appendices documenting the models used to evaluate projects and alternatives for the 2023 Coastal Master Plan were made available well in advance of the draft plan's release.

COMMUNITY CONVERSATIONS

CPRA along with Restore the Mississippi River Delta and several local partners hosted a series of community conversations ahead of the 2023 Coastal Master Plan's official release in January 2023.

The meetings in November and December provided an opportunity for communities across the coast to engage directly with the Master Plan Team.

Topics discussed included:

- Discussion on how CPRA is addressing challenges facing specific regions
- Near-term regional projects considered for the 2023 Draft Coastal Master Plan
- What a future without action looks like across the coast and in specific region
- Review of draft 2023 plan regional and coastwide maps
- Demonstration of the updated beta version of the Master Plan Data Viewer (interactive)

Each meeting began with an open house and complimentary dinner followed by a short presentation and longer discussion. The meetings included an interactive demonstration of the updated Master Plan Data Viewer, which was developed along with the plan. Meetings dates and locations are noted below.

- November 1, 2022 – Belle Chasse
- November 3, 2022 – Violet
- November 9, 2022 – New Orleans
- November 10, 2022 – Larose
- November 16, 2022 – Lacombe
- November 17, 2022 – Abbeville
- November 30, 2022 – Gonzales
- December 13, 2022 – Grand Lake

4.0 ADVISORY GROUPS

Throughout the master plan development process, advisory groups provided valuable feedback and recommendations that reflected broad, cross-interest perspectives.

4.1 COASTAL ADVISORY TEAM (CAT)

The intent of the CAT is to provide input and feedback on the 2023 Coastal Master Plan process and components. The CAT includes invited representatives who have a coastwide, big picture perspective of coastal challenges and opportunities from federal, state, and local government; NGO's; business and industry; and academia. The goal of the CAT is to discuss options, solicit ideas, gain input to the planning process, and provide recommendations to CPRA.

4.2 REGIONAL WORKGROUPS (RW)

In addition to the CAT, CPRA has convened RWs to obtain regionally-informed perspectives from a variety of stakeholders and interests within five coastal regions: Chenier Plain, Central Coast, Terrebonne Basin, Barataria Basin, and Pontchartrain/Breton Basin. The invited RW members work collaboratively to identify, discuss, and reach a common understanding about issues, priorities, and possible solutions for each coastal region and provide recommendations to CPRA.

4.3 COMMUNITY ENGAGEMENT WORKGROUP (CEW)

For the 2023 Coastal Master Plan, CPRA convened the CEW to support the development of relevant communication strategies and provide input on outreach and engagement efforts. The CEW works with CPRA to review and discuss options for displaying and communicating master plan data, provide feedback on the planning process for the 2023 Coastal Master Plan, and serve as partners for broadening the scope of master plan outreach efforts. The CEW are invited members who represent housing, tribal, health, and social justice community interests from across coastal Louisiana and provide recommendations to CPRA.

Table 8. Community Engagement Workgroup members
