1043(B) PROPOSALS

St. Tammany Parish Feasibility Study

Southwest Coastal Home Elevations

Summit at Sea Level Action Items:

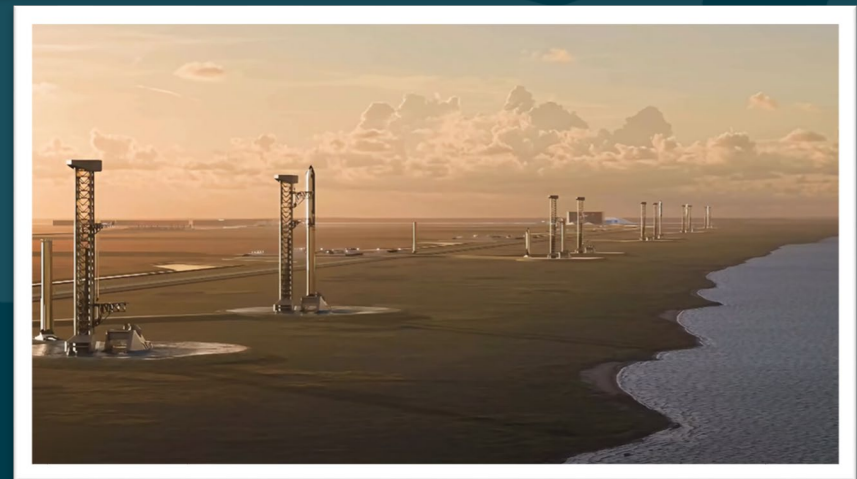

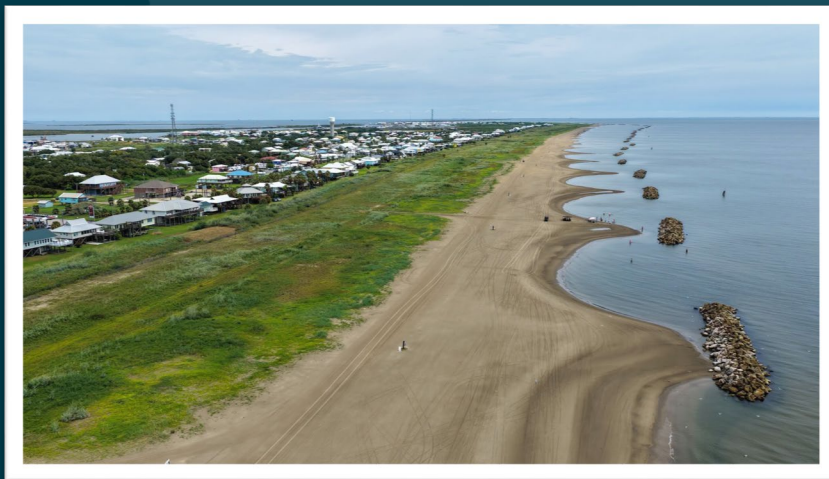

- Ensure the implementation of the definition of physically separable elements maximizes the opportunities related to Section 1043(b) applications, allowing non-federal sponsors more opportunities to implement civil works projects.
- Work towards “Nonstructural for Louisiana,” allowing the State of Louisiana to implement the residential nonstructural component of congressionally authorized projects. This currently includes over 10,000 structures in Calcasieu, Cameron, Vermilion, St. Mary, Iberia, St. Martin, and St. Tammany Parishes.
